

General Session: Security Turned Upside Down

Ken Michael, Dox Electronics, Inc.

1 CEU Privacy and Security

When it comes to security, Ken has done his research and then some. After gathering real statistics to see what is being done right and what is being done wrong, he found that many companies are putting money in the wrong places where they get no ROI and don't help the bottom line. Learn how to make smart decisions about your security, including the Onion Model (doxmsp.com/onion) with multiple layers of defense.
